

## QUALITY, AFFORDABLE, SECURE

Check fraud is big business. The problem is that technology is advancing so rapidly, it has become incredibly easy to create false documents. Our check stock, rich in security features, makes it difficult for your checks to be copied and is the best in anti-fraud protection.

## SHIPPING

## SECURITY FEATURES

As experts in the field of document security, our check stock offers **7 different security features** to protect your business.

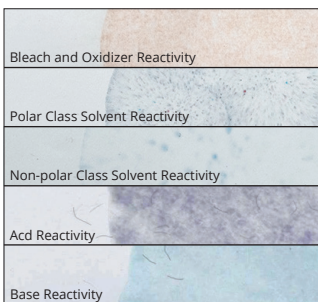

### INVISIBLE FLUORESCENT FIBERS

Yellow or blue fluorescent fibers are embedded in the sheet and are visible only when the sheet is exposed to a black light.

### PRINTLOC® TONER ADHESION

Saturation treatment on both sides of paper prevents toner removal by scraping, tape or creasing.

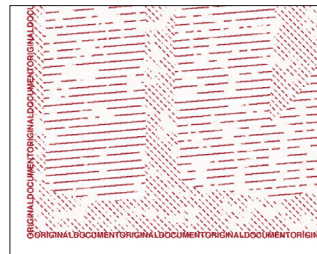

### PRIMARY INDICATOR STAINS

This measure protects against alteration by changing color when exposed to polar class solvent reactivity (approx 30 solvents). Providing easy recognizable signs of attempted alteration.

### HEAT SENSITIVE CHECK 21 LOGO

Disappears when rubbed or heated.

### MICROPRINT CHECK BORDER

Extremely small type (.010). It appears as a straight line to the naked eye but can be verified under magnification. When attempts are made to copy or scan, the type becomes a solid line.

### TOP POSITION BORDER WARNING IN PANTO INK COLOR

A warning is printed in the border advising that security features are on the check. It gives the recipient the opportunity to verify the check and reject it if the features do not match the warning description.

### VOID PANTOGRAPHS

When an attempt to photocopy or scan is made, the "VOID" will show up on the copied or scanned check. This process is effective against most black and white and color copiers.
