

The government sector represents a significant market opportunity for print distributors, with federal, state, and local governments collectively spending more than \$1 billion on printing annually. This includes high-quality labels at all levels of government, from office and security applications to asset management and ID cards. Given the size and scope of this market, distributors specializing in labels and tags have a unique opportunity. By delivering high-quality, customizable solutions that meet the government's stringent requirements, they can establish enduring partnerships and build highly profitable pockets of business.

At Wise, we specialize in labels for the government sector, including fully custom labels and tags for specialized applications and needs. Contact us our label plant in Anderson, SC, to find out how we can help you stay ahead in this high-profit market.

Federal, state, and local governments spend more than \$1 billion on printing each year, representing a significant market opportunity for print distributors. With their vast scale and diverse needs, agencies at all levels of government rely on high-quality forms for a range of purposes. Because of their need to make forms available to every citizen, many of those forms remain in paper. By providing high-quality, customizable solutions that meet the stringent requirements of governmental agencies, distributors can build highly profitable pockets of business.

At Wise, we specialize in government forms, including fully custom forms for specialized applications and needs. Contact us at one of our four forms manufacturing plants to find out how we can help you stay ahead in this high-profit market.
